

# **MU Series Mini Free Mount Cylinder**

## Compendium of MU Series

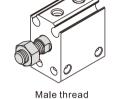

#### Magnetic switch slots around the cylinder body

There are magnetic switch slots around the cylinder body convenient to install inducting switch.

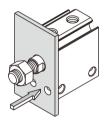

#### Two kinds of rod type

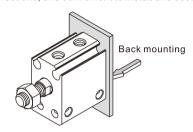

Mounted from 4 directions

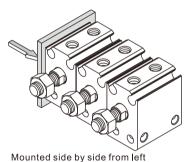

Cylinder can be mounted from 4 directions, and convenient to install and use.

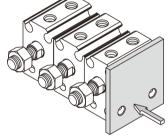

Mounted side by side

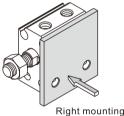

Multitudinous cylinder can be mounted side by side to save space.

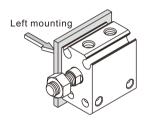

Mounted side by side from right

Front mounting

Criteria for selection: Cylinder thrust

Unit: Newton(N)

# Installation and application

- 1. When load changes in the work, the cylinder with abundant output capacity shall be selected.
- 2. Relative cylinder with high temperature resistance or corrosion resistance shall be chosen under the condition of high temperature or corrosion.
- 3. Necessary protection measure shall be taken in the environment with higher humidity, much dust or water drops, oil dust and welding dregs.
- 4. Dirty substances in the pipe must be eliminated before cylinder is connected with pipeline to prevent the entrance of particles into the cylinder.
- 5. The medium used by cylinder shall be filtered to  $40\mu m$  or below.
- 6. As both of the front cover and piston of the cylinder are short, typically too large stroke can not be selected.
- 7. Anti-freezing measure shall be adopted under low temperature environment to prevent moisture freezing.
- 8. The cylinder shall avoid the influence of side load in operation to maintain the normal work of cylinder and extend the service life.
- 9. If the cylinder is dismantled and stored for a long time, please conduct anti-rust treatment to the surface. Anti-dust caps shall be added in air inlet and outlet ports. The front and back cover can not be dismantled, which shall be especially noticed.

### **Product feature**

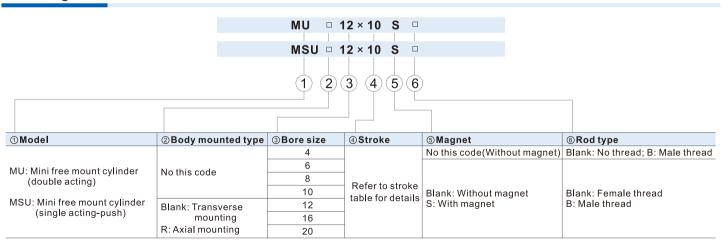

- 1. JIS standard is implemented.
- 2. Cylinder can be mounted from 4 directions, and convenient to install and use.
- 3. Multitudinous cylinder can be mounted side by side to save space.
- The front end of the cylinder is designed with boss.
  Centering can be done easily.
- 5. The internal diameter of the body is treated with rolling followed by the treatment of hard anodizing, forming an excellent abrasion resistance and durability.
- 6. With magnet type is of the feature of position sensing.
- 7. There are magnetic switch slots around the cylinder body, which is convenient to install inducting switch.
- 8. The seal of piston adopts heterogeneous two-way seal structure. It has compact dimension and the function of grease reservation.

20	Single acting	5 10	10

- Note) 1. Please contact the company for other special strokes.
  - The dimensions of non-std stroke cylinder has the same dimensions as the next longer stroke std. stroke cylinder. e.g. 23mm stroke cylinder has the same dimensions of 25 std. stroke cylinder.

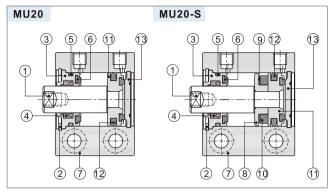

#### Ordering code

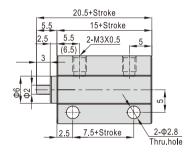

## Inner structure and material of major parts

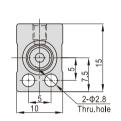

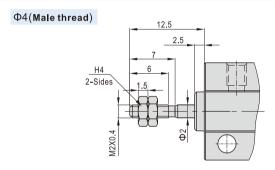

NO.	Item	Material
1	Piston rod	Stainless steel or Carbon steel with 20µm chrome plated
2	C clip	Spring steel
3	Front cover	Aluminum alloy
4	Front cover packing	NBR
5	O-ring	NBR
6	Bumper	TPU
7	Body	Aluminum alloy
8	Magnet holder	Brass(Φ12)/Aluminum alloy(Others)
9	Magnet washer	NBR
10	Magnet	Sintered metal (Neodymium-iron-boron)
11	Piston	Brass(Φ12,16)/Aluminum alloy(Others)
12	Piston seal	NBR
13	Back cover	No(Φ12,16)/Aluminum alloy(Others)
