Ignition Transformers

ELECTRONIC IGNITION TRANSFORMERS

This transformer is produced with the electronic technology, the system is vacuum impregnated to ensure the highest rate of insulation. The features of this transformer make it suitable for gas and oil burners where is required continuous power, with smaller size and weight than conventional inductive transformers.

The Applications

The electronic ignition transformer is suitable to be applied to all kind of oil and gas burners, wall hang boilers, hot water high pressure cleaners and anti-mosquito equipment. These applications are indicated by a symbol beside each type of product as follows.

Oil Burners	
Gas Burners	
Hot water high pressure cleaners	
Anti-mosquito equipment

	TRW2P4R	220-240V	7W	5 mA	5 mJ	1x15 kV	100%	60°C	Grounded pole

This Ignition transformer is built to satisfy the power requirement of condensing and atmospheric boilers. Thanks to its particular electronic configuration it delivers a very high power output to ensure the ignition even on most difficult conditions. This product is available as "over the gas valve" mounting version. The integrated single pole flame detection signal is available.

ELECTRONIC IGNITION TRANSFORMER TRJ	Type	Vin	Pin	Iout cc	Iout Burn*	Vout	ED	Ta	Output

TRL24-30PC	24V DC	80W	30 mA	22 mA	1x15kV	100%	60°C	Grounded pole	

This is a 12 and 24 VDC HIGH POWER electronic transformer suitable for heavy oil and gas burners. It is very performant, with high spark currents on continuous duty conditions even on severe working temperatures.

*Iout Burn.= Current measured on the burner with 5mm spark gap, blowing air and suppressed cables.

INDUCTIVE TRANSFORMERS

Traditional electro-mechanic transformer, It can be customized in many different versions to fit the requirements of any kind of application like oil and gas burners, high pressure cleaners, anti-mosquito equipments, ozone generators.

The Applications

The conventional ignition transformer is suitable to be applied to all kind of oil and gas burners, hot water high pressure cleaners and anti-mosquito equipment. These application are indicated by a symbol beside each type of product as follows.

Oil Burners	
Gas Burners	
Hot water high pressure cleaners	
Anti-mosquito equipment	

The inlets

These icons represent all the different kind of connection for each product

Standard buried cable L=380mm		COFI plug		Triangle plug	
-------------------------------	--	-----------	---	---------------	---

The outlets

These icons represent the outlets types available on every single product

Code SP, eccentric plug, Ø 4 (21.5 mm deep)		Code SPPRO, hole Ø 6, plug Ø 4 for cable Ø 5.2 (35 mm deep)	
Code VIMAN, self-tapping screw with sleeve (25 mm deep)		Code SPMAN, plug Ø 4 with sleeve (23 mm deep)	
Code SPRAS, flush plug, Ø 4 (13.5 mm deep)		Code VIRAS, flush self-tapping screw (18 mm deep)	

Transformer TRZ	Type	Vin	Freq	Vout	Iout	ED	Output	Notes

	TRE820PISO	230V	50Hz	1x8 kV	20 mA	19% on 3'	Grounded pole	Insulated

Small dimension transformer, it achieves the same performances of medium size transformers with lower costs, largely used for oil and gas burners, available with the secondary insulated for flame detection by ionization of the flame. It can also be applied to anti-mosquito equipment or ozone generators.

***The whole range is available with input voltages between 100 and 400V

i-GAS

Automatic control for gas burners with ignition and flame detection integrated:

It allows the control of a single direct ignition burner till 350kW, with flame detection integrated (single electrode) or separate electrode. i-GAS can freely fit to many different application conditions thanks to its easy programmability. Some parameters are factory settled and password protected, directive compliant, others are customizable following customer's needs. An advanced self diagnostic system provide through an alphanumeric display all information about the cycle, lock causes, eventual applied device's failures, or burner's failures. The reset push button, and its warning light, can be remoted through a socket connection. The ignition transformer provide a high energy spark that warrant the ignition in every situation. It is possible to use the same ignition electrode both to make ignition and flame readings. For ionization, or with a separate electrode (dedicated), plugging it directly to the control device socket. The socket give to the device easy serviceability, allowing quick plug/unplug operability. i-GAS represents the burner's supervisor being active all the time the power is on, even when the thermo switch do not require heat. All connected devices are monitored all the time, even in stand by condition. Any uneven failure might be detected before power heat is demanded by the thermo switch. The circuit configuration allows the manufacturer to simplify cable harness of burners main case.

Technical specification

Power Supply	230 V ±15%	Pre-blowing	1÷250 s	Minimum ionization current	> 1 µA
Frequency*	50/60 Hz	Pre-ignition	500 ms	ionization current limits	0,5 mA
Power Consumption	3 VA MAX	Safety time on ignition	2÷25 s	Flame detection probe voltage	250 V ac
Power dissipation	2W MAX	Safety time running	1÷12 s	Flame detection probe insulation	> 50 MΩ

The Applications

TOP MOUNTED VALVE IGNITER

Development of capacitance discharge igniters to be mounted directly on the gas valve's top. This igniter is been studied for the application on wall hang boilers where the spaces are narrow and the wiring harness need to be simplified. The transformer can drive the solenoid valves directly or with an inner DC converter. Only one wire is connected with the control device providing Ignition power, flame signal and valve driving power. The output wire is used both for ignition and flame detection with single electrode. Different version are available to be fitted on each valve.

High-voltage cables

Cofi manufactures high voltage ignition cable for all market needs. From the simple copper wire with connector to more complex cable with carbon fiber conductor, connector and moulded protections. The High voltage cables with resistive conductor in carbon fiber and semi-conductive rubber are used for shielding electromagnetic disturbances. Our EMC laboratory is fully equipped with instrument for EMC measurements for cable's and filters verifications.

SILICONE/CARBON FIBER cable
1x1 diameter 7
Resistive cable 10 kOhm/m

diameters 4.7-5.2-7 mm

Code: 17GO172604

Installed cable lengths

Complete high-voltage cables. Complete cable for high pressure cleaners. It ensures perfect sealing of the transformer outputs for perfect protection against humidity in dirty and contaminated environments.

Cable in silicone/copper or silicone/ carbon fiber, diameter 7 mm. Custom-made length.

Connector, diameter 4 mm, overmoulded.

90° Connector, diameter 6.3 mm, with terminal cover.

Mounting brackets

40X40 mm galvanized bracket

Bracket for horizontal mounting of transformer on any surface.

Code: 15MI152457

Kit with screws and nuts available

102X26 mm galvanized bracket

Bracket for vertical mounting of transformer on any surface.

Code: 15MI152452

Kit with screws and nuts available

Filters

Emi disturbance suppression filter

Code: 06CE061517
